COMMUNICATION & DOMOTIC SOLUTIONS   HOME

Where, when and how you need it. An unequalled duo of elegance and revolutionary modularity.

Sinthesi, a byword for unique, inimitable styling. Anodised aluminium frame, stainless steel keys, name cards with led type back-lighting, in an attractive amber colour, all designed to create an impression of high-tech elegance.

Sinthesi also offers an unmatched range of application possibilities: key modules with double call button; TV camera modules with outside door speaker unit and integrated call keys both for coax and 5-wire systems (without coax cable); with led-based user call feedback (the led lights up only if the door phone or the video door phone has received the call). Sinthesi represents a real revolution also in the case of installation in existing systems. It caters to any type of situation without having to adjust wall openings to accommodate the entrance panel.

This means that you can replace a previous Kombi system with a new Sinthesi entrance panel extremely easily, without having to replace the embedding box.

TV camera module.

Back-lit keys.

Constantly-evolving modularity.

But Sinthesi has much more to offer in terms of modularity because it is an "open" system that you can transform or expand to keep step with changing installation requirements.

For example, the possibility of choosing a functional gate pillar for Sinthesi so as to exploit all the versatility of installation of the entrance panel.

But Urmet designs today with the future in mind and Sinthesi will soon be available in versions compatible with all the door opener modules and integrated systems, such as Digivoice and Bibus, to make your home both intelligent and modular.

COMMUNICATION & DOMOTIC SOLUTIONS

Sinthesi entrance panel.
Innovating to make life simpler.

What does an video door phone entrance panel need to make it truly intelligent?
The answer is complete modularity. So Urmet decided to create Sinthesi, a perfect combination of technology, design and versatility with no limits as regards application. With its new module-based system, Sinthesi reveals all its brilliant originality.
Simply choose the modules you require, whether with TV camera or outside door speaker unit, one, two, three keys or even more, add the correct frame and in no time at all your home is ready to welcome guests in a new, unmistakable style.
But the mould-breaking design of Sinthesi is also reflected in its revolutionary versatility that makes it possible to create horizontal and vertical entrance panels that blend seamlessly with any type of decor or the specific characteristics of your home. Interconnection of the modules using the conductors pre-wired on these and sliding track connection terminal strips to the system make Sinthesi extremely easy to install.
Urmet also provides a kit for customisation of the frame end caps combined with blue name cards.

MODULES ARRANGED FOR LOUDSPEAKING UNIT

●■◆▲	**Ref. 1145/20**	Anodised aluminium module pre-engineered for outside door speaker unit without call keys.
●■◆▲	**Ref. 1145/21**	Anodised aluminium module pre-engineered for outside door speaker unit with 1 call key.
●■	**Ref. 1145/22**	Anodised aluminium module pre-engineered for outside door speaker unit with 2 call keys.
●■◆▲	**Ref. 1145/32**	Anodised aluminium module pre-engineered for outside door speaker unit with 1 double call key.*
●■	**Ref. 1145/34**	Anodised aluminium module pre-engineered for outside door speaker unit with 2 double call keys.*
